

CLOUD ACCESS SECURITY BROKER (CASB) SERVICES

CONTROL CLOUD ACCESS. PROTECT DATA. ENABLE SECURE COLLABORATION.

As organizations adopt SaaS and cloud services at scale, sensitive data increasingly moves beyond traditional security boundaries. This shift introduces risks such as data leakage, shadow IT, compliance gaps, and unauthorized access.

Haden Grey's Cloud Access Security Broker (CASB) services help organizations regain visibility and control over cloud application usage while protecting sensitive data. We enable secure SaaS adoption by enforcing consistent security policies across cloud environments without disrupting user productivity.

Our approach blends deep cloud security expertise, policy-driven governance, and white-glove delivery to ensure strong protection and business alignment.

SERVICE OVERVIEW

Haden Grey delivers end-to-end CASB services spanning advisory, design, implementation, and managed services. We help organizations:

- Gain visibility into SaaS usage and shadow IT
- Enforce consistent data protection policies
- Protect sensitive data across cloud apps
- Reduce insider and external data leakage risks
- Support regulatory and compliance requirements
- Enable secure cloud collaboration

Our services are vendor-agnostic and tailored to your SaaS footprint, risk tolerance, and compliance needs.

OUR **DELIVERY** METHODOLOGY

Assess

Evaluate SaaS usage, risks, and data exposure.

Design

Develop scalable CASB architectures and policy models.

Implement

Deploy controls with minimal business disruption.

Operate & Optimize

Continuously improve cloud visibility and protection.

CORE CAPABILITIES

1. Cloud Visibility & Shadow IT Discovery

See What's in Your Cloud

We provide visibility into sanctioned and unsanctioned cloud application usage.

Capabilities Include:

- SaaS discovery and usage analysis
- Shadow IT identification
- Risk scoring of cloud apps
- User and data activity monitoring
- Cloud service inventory reporting

Benefits:

- Reduced blind spots
- Better risk awareness
- Informed decision-making

2. Data Protection & DLP for SaaS

Protect Sensitive Data in the Cloud

We enforce data protection policies across SaaS environments.

Capabilities Include:

- Data Loss Prevention (DLP) policies
- Content inspection and classification
- Data sharing controls
- Encryption and tokenization integration
- Policy enforcement across apps

Benefits:

- Reduced data leakage
- Stronger compliance posture
- Secure collaboration

3. Access Control & Policy Enforcement

Context-Aware Cloud Security

We enforce adaptive policies based on user, device, and context.

Capabilities Include:

- Conditional access enforcement
- Device posture integration
- Location-aware policies
- Session controls
- Real-time access governance

Benefits:

- Reduced unauthorized access
- Better user risk management
- Improved Zero Trust alignment

4. Threat Protection

Detect and Stop Cloud Threats

We identify suspicious behavior and cloud-based threats.

Capabilities Include:

- Anomaly detection
- Behavioral analytics
- Malware detection in SaaS
- Account compromise detection
- Integration with SOC tools

Benefits:

- Faster threat detection
- Reduced breach impact
- Improved incident response

5. Compliance & Governance Support

Operationalize Cloud Compliance

We align CASB controls to regulatory requirements.

Capabilities Include:

- Compliance control mapping
- Audit-ready reporting
- Policy alignment to regulations
- Data residency oversight
- Governance framework design

Benefits:

- Reduced regulatory risk
- Audit readiness
- Stronger governance

6. Secure Collaboration Enablement

Protect Data Without Slowing Teams Down

We balance security and productivity in cloud collaboration tools.

Capabilities Include:

- Secure file sharing policies
- External sharing controls
- Real-time policy coaching
- User awareness integration
- Collaboration risk monitoring

Benefits:

- Safer collaboration
- Improved user adoption
- Reduced friction

TECHNOLOGY ALIGNMENT

Haden Grey works across leading CASB and SSE ecosystems to deliver interoperable cloud security solutions.

Common CASB platforms include:

- Microsoft Defender for Cloud Apps
- Netskope
- Zscaler CASB
- Palo Alto Networks Prisma SaaS
- Forcepoint CASB

CASB ADVISORY SERVICES

- CASB readiness assessments
- SaaS risk assessments
- Tool evaluation and rationalization
- Cloud governance strategy
- Policy framework design
- M&A SaaS security integration planning

IMPLEMENTATION SERVICES

- CASB platform deployment and configuration
- SaaS app onboarding
- Policy creation and tuning
- Identity and SIEM integration
- DLP integration
- Automation enablement

MANAGED CASB SERVICES

- Continuous monitoring and tuning
- Policy optimization
- Incident support
- Reporting and metrics
- SLA-based support models
- Continuous improvement programs

BUSINESS OUTCOMES

Organizations partnering with Haden Grey achieve:

- Reduced data leakage risk
- Visibility into cloud usage
- Stronger SaaS governance
- Improved regulatory compliance
- Secure collaboration enablement
- Better insider risk management
- Scalable cloud security controls

WHY HADEN GREY

Clients choose Haden Grey for:

- Deep cloud and data security expertise
- Vendor-agnostic advisory
- Proven enterprise delivery
- Security-first, business-aligned approach
- White-glove client service
- Practical, outcome-driven solutions
