

CLOUD SECURITY POSTURE MANAGEMENT (CSPM) SERVICES

CONTINUOUS VISIBILITY. PROACTIVE RISK REDUCTION. CONFIDENT CLOUD ADOPTION.

Cloud environments evolve rapidly, new services, workloads, and configurations are deployed daily. Without continuous oversight, misconfigurations and policy gaps can expose organizations to breaches, compliance violations, and operational risk.

Haden Grey's Cloud Security Posture Management (CSPM) services help organizations continuously assess, monitor, and improve their cloud security posture. We identify misconfigurations, enforce security best practices, and align cloud environments to regulatory and organizational standards.

Our approach blends cloud-native expertise, automation-first methodologies, and practical governance models to reduce risk while enabling secure innovation.

SERVICE OVERVIEW

Haden Grey delivers end-to-end CSPM services spanning advisory, design, implementation, and managed services. We help organizations:

- Gain continuous visibility across cloud environments
- Detect and remediate misconfigurations
- Enforce security and compliance policies
- Reduce cloud-related risk exposure
- Support DevOps and cloud governance initiatives
- Enable secure multi-cloud adoption

Our services are vendor-agnostic and tailored to your cloud platforms, risk tolerance, and compliance requirements.

OUR **DELIVERY** METHODOLOGY

Assess

Evaluate current cloud posture, risks, and compliance gaps.

Design

Develop scalable policy frameworks and guardrails.

Implement

Deploy posture management with minimal disruption.

Operate & Optimize

Continuously improve posture and governance.

CORE CAPABILITIES

1. Cloud Posture Visibility & Asset Inventory

Know Your Cloud Environment

We provide centralized visibility into cloud resources and configurations.

Capabilities Include:

- Multi-cloud asset discovery
- Configuration inventory
- Resource relationship mapping
- Exposure analysis
- Risk-based asset prioritization

Benefits:

- Reduced blind spots
- Better situational awareness
- Informed security decisions

2. Misconfiguration Detection & Remediation

Fix Issues Before They Become Breaches

We identify and help remediate risky configurations.

Capabilities Include:

- Continuous configuration scanning
- Best-practice benchmarking (CIS, NIST, CSA)
- Automated alerting
- Remediation guidance and playbooks
- Drift detection

Benefits:

- Reduced breach likelihood
- Faster remediation cycles
- Improved security hygiene

3. Policy & Governance Enforcement

Consistent Security Guardrails

We implement guardrails that enforce security standards.

Capabilities Include:

- Policy definition and codification
- Preventive and detective controls
- Infrastructure-as-Code policy checks
- Compliance rule mapping
- Exception management workflows

Benefits:

- Consistent enforcement
- Reduced human error
- Scalable governance

4. Compliance Monitoring & Reporting

Operationalize Cloud Compliance

We align CSPM controls to regulatory frameworks.

Capabilities Include:

- Continuous compliance monitoring
- Regulatory mapping (PCI-DSS, HIPAA, GDPR, SOC 2, ISO 27001, etc.)
- Audit-ready reporting
- Control validation
- Evidence collection support

Benefits:

- Audit readiness
- Reduced compliance burden
- Clear reporting for stakeholders

5. DevSecOps Integration

Security Early in the Lifecycle

We embed posture management into cloud delivery pipelines.

Capabilities Include:

- IaC scanning
- CI/CD security checks
- Pre-deployment policy validation
- Developer feedback loops
- Automation integration

Benefits:

- Fewer production risks
- Faster secure deployments
- Stronger DevSecOps culture

6. Multi-Cloud Posture Management

Unified Oversight Across Providers

We manage posture consistently across environments.

Capabilities Include:

- Cross-cloud visibility
- Policy harmonization
- Centralized dashboards
- Hybrid cloud coverage
- Risk aggregation and scoring

Benefits:

- Simplified operations
- Consistent controls
- Reduced complexity

TECHNOLOGY ALIGNMENT

Haden Grey works across leading CSPM and broader CNAPP ecosystems to deliver interoperable cloud security.

Common CSPM platforms include:

- Palo Alto Networks Prisma Cloud
- Wiz
- Orca Security
- Microsoft Defender for Cloud
- AWS Security Hub & Config
- Google Cloud Security Command Center
- Lacework
- Check Point CloudGuard
- Trend Micro CloudOne – Conformity

CSPM ADVISORY SERVICES

- Cloud posture maturity assessments
- Governance model design
- Policy framework development
- Tool evaluation and rationalization
- Cloud risk assessments
- M&A cloud posture reviews

IMPLEMENTATION SERVICES

- CSPM platform deployment and configuration
- Policy and rule creation
- Alert and workflow setup
- Integration with SIEM/SOAR
- Automation enablement

MANAGED CSPM SERVICES

- Continuous posture monitoring
- Alert triage and tuning
- Policy optimization
- Reporting and metrics
- SLA-based support models
- Continuous improvement programs

BUSINESS OUTCOMES

Organizations partnering with Haden Grey achieve:

- Reduced misconfiguration risk
- Continuous compliance visibility
- Improved cloud governance
- Faster remediation cycles
- Stronger multi-cloud security posture
- Greater executive confidence in cloud adoption
- Scalable, repeatable cloud security practices

WHY HADEN GREY

Clients choose Haden Grey for:

- Deep cloud and data security expertise
- Vendor-agnostic advisory
- Proven enterprise delivery
- Security-first, business-aligned approach
- White-glove client service
- Practical, outcome-driven solutions
