

DATA PROTECTION & COMPLIANCE SERVICES

PROTECT SENSITIVE DATA. ENABLE TRUST. MEET REGULATORY DEMANDS.

Data is one of your organization's most valuable, and most targeted, assets. As data volumes grow across cloud, SaaS, and hybrid environments, organizations face increasing risk from breaches, misuse, and regulatory scrutiny.

Haden Grey's Data Protection & Compliance services help organizations safeguard sensitive data wherever it resides while meeting global regulatory requirements. We enable businesses to protect data without slowing innovation, ensuring security and compliance become business enablers.

Our approach combines deep security expertise, privacy-aware design, and practical compliance strategies to reduce risk and build trust.

SERVICE OVERVIEW

Haden Grey delivers end-to-end data protection and compliance services spanning advisory, design, implementation, and managed services. We help organizations:

- Protect sensitive data at rest, in transit, and in use
- Reduce risk of data breaches and leakage
- Meet regulatory and contractual obligations
- Improve visibility into data risk
- Enable secure digital transformation
- Build sustainable compliance programs

Our services are vendor-agnostic and tailored to your data landscape, regulatory environment, and business objectives.

OUR DELIVERY METHODOLOGY

Assess

Identify sensitive data, risks, and compliance gaps.

Design

Develop data protection architectures and compliance frameworks.

Implement

Deploy controls with minimal business disruption.

Operate & Optimize

Continuously improve protection and compliance posture.

CORE CAPABILITIES

1. Data Discovery & Classification

Know What You Have and Where it Lives

We help organizations discover and classify sensitive data across environments.

Capabilities Include:

- Structured and unstructured data discovery
- Sensitive data identification (PII, PHI, PCI, IP)
- Data classification frameworks
- Data mapping and inventory creation
- Risk-based data categorization

Benefits:

- Clear visibility into sensitive data
- Risk-based prioritization
- Stronger protection strategies

2. Encryption & Key Management

Protect Data at Rest and in Transit

We design and implement encryption strategies aligned to business and regulatory needs.

Capabilities Include:

- Data-at-rest encryption
- Data-in-transit encryption
- End-to-end encryption strategies
- Centralized key management design
- Hardware Security Module (HSM) guidance
- Bring Your Own Key (BYOK) models

Benefits:

- Reduced breach impact
- Regulatory alignment
- Strong cryptographic controls

3. Tokenization & Data Masking

Limit Exposure of Sensitive Data

We reduce risk by minimizing use of raw sensitive data.

Capabilities Include:

- Format-preserving tokenization
- Static and dynamic data masking
- Pseudonymization strategies
- Test-data protection
- Analytics-safe masking models

Benefits:

- Lower compliance scope
- Reduced insider risk
- Safer data sharing

4. Data Loss Prevention (DLP)

Prevent Unauthorized Data Movement

We design DLP programs that balance protection and productivity.

Capabilities Include:

- Endpoint, network, and cloud DLP
- Policy design and tuning
- Insider risk mitigation
- Content inspection and fingerprinting
- Incident workflow integration

Benefits:

- Reduced data leakage
- Improved monitoring
- Better policy enforcement

5. Privacy & Compliance Programs

Operationalize Compliance

We help organizations build practical, defensible compliance programs.

Capabilities Include:

- Regulatory gap assessments
- Compliance control mapping
- Privacy-by-design frameworks
- Data retention policy design
- Third-party data risk assessments
- Audit preparation support

Common frameworks supported include:

GDPR, HIPAA, PCI-DSS, CCPA/CPRA, GLBA, and other regional regulations.

Benefits:

- Reduced regulatory risk
- Audit readiness
- Stronger governance

6. Data Security Architecture

Security Built Into Data Flows

We design architectures that protect data across its lifecycle.

Capabilities Include:

- Secure data flow design
- Zero Trust data protection models
- API data protection
- Secure data sharing architectures
- Cross-border data transfer strategies

Benefits:

- Reduced exposure
- Scalable protection
- Consistent controls

TECHNOLOGY ALIGNMENT

Haden Grey works across leading data security and compliance ecosystems to deliver interoperable solutions.

Common Technology Ecosystems include:

- Microsoft Purview & Information Protection
- Broadcom (Symantec) DLP
- Netskope DLP
- Zscaler Data Protection
- HashiCorp Vault (encryption & secrets)
- Cloud-native encryption and key management services

ADVISORY SERVICES

- Data protection maturity assessments
- Privacy impact assessments (PIAs)
- Data risk assessments
- Compliance readiness reviews
- Board and executive advisory
- M&A data risk strategy

IMPLEMENTATION SERVICES

- Encryption and DLP deployment
- Classification framework rollout
- Tokenization implementation
- Compliance control implementation
- Monitoring integration

MANAGED DATA PROTECTION SERVICES

- DLP policy tuning and operations
- Incident support
- Compliance reporting
- Control monitoring
- SLA-based support models
- Continuous improvement programs

BUSINESS OUTCOMES

Organizations partnering with Haden Grey achieve:

- Reduced breach and leakage risk
- Stronger regulatory compliance
- Improved visibility into sensitive data
- Greater customer and partner trust
- Lower compliance costs over time
- Scalable data protection strategies

WHY HADEN GREY

Clients choose Haden Grey for:

- Deep data security and privacy expertise
- Vendor-agnostic advisory
- Proven enterprise delivery
- Security-first and privacy-aware design
- White-glove client service
- Practical, outcome-driven strategies
