

ENDPOINT DEVICE CONTROL & DATA LOSS PREVENTION (DLP) SERVICES

PROTECT SENSITIVE DATA. CONTROL DEVICES. PREVENT DATA LOSS AT THE SOURCE.

Endpoints are where data is created, accessed, and often exfiltrated. USB drives, local storage, print services, and unsanctioned applications create significant data leakage risk. Insider threats—both malicious and accidental—remain one of the top causes of data breaches.

Haden Grey's Endpoint Device Control & Data Loss Prevention (DLP) services help organizations prevent unauthorized data movement and protect sensitive information at the endpoint.

We design and implement data-centric protections that reduce leakage risk while enabling business productivity.

Our approach blends deep data security expertise, practical policy design, and white-glove delivery to ensure strong protection without disrupting users.

SERVICE OVERVIEW

Haden Grey delivers end-to-end endpoint DLP and device control services spanning advisory, architecture, implementation guidance, and optimization. We help organizations:

- Prevent data exfiltration at endpoints
- Control removable media and peripheral usage
- Protect sensitive data in use
- Reduce insider threat risk
- Support regulatory compliance
- Improve visibility into data movement

Our services are vendor-agnostic and tailored to your data sensitivity, workforce model, and compliance needs.

OUR **DELIVERY** METHODOLOGY

Assess

Evaluate data risks, user behaviors, and control gaps.

Design

Develop scalable, risk-based DLP architectures.

Implement (Guide & Validate)

Support deployment with minimal disruption.

Optimize

Continuously refine policies and effectiveness.

CORE CAPABILITIES

1. Endpoint DLP Strategy & Program Design

Build a Sustainable DLP Program

We define structured, risk-based DLP programs.

Capabilities Include:

- DLP roadmap development
- Policy framework design
- Data classification alignment
- Risk-based control mapping
- Governance model design

Benefits:

- Clear program direction
- Better data protection maturity
- Sustainable controls

2. Device Control & Peripheral Management

Control How Data Leaves Devices

We manage and restrict peripheral usage.

Capabilities Include:

- USB and removable media control
- Bluetooth and peripheral restrictions
- Print and clipboard control
- Device allowlisting/blocklisting
- Granular device permissions

Benefits:

- Reduced data exfiltration risk
- Better device oversight
- Controlled data transfer

3. Data-in-Use Protection

Protect Data at the Point of Interaction

We enforce policies where users interact with data.

Capabilities Include:

- Copy/paste controls
- Screen capture protection
- Local file monitoring
- Application-aware controls
- Context-based restrictions

Benefits:

- Reduced accidental leakage
- Stronger data safeguards
- Real-time prevention

4. Content Inspection & Classification Integration

Protect the Right Data

We align DLP to data sensitivity.

Capabilities Include:

- Content inspection rules
- Keyword and regex detection
- Fingerprinting and exact data matching
- Classification label integration
- Policy mapping to sensitivity levels

Benefits:

- Reduced false positives
- Better targeting
- Effective protection

5. Insider Risk Mitigation

Reduce Human-Driven Risk

We help detect and prevent insider-driven incidents.

Capabilities Include:

- Behavioral monitoring alignment
- User activity visibility
- Risk-based policy enforcement
- Alert tuning and triage frameworks

Benefits:

- Reduced insider threat risk
- Faster incident detection
- Better oversight

6. Incident Management & Reporting

Operationalize DLP

We design workflows for DLP operations.

Capabilities Include:

- Incident response workflows
- Escalation path design
- Reporting dashboards
- Compliance reporting alignment

Benefits:

- Faster response
- Clear accountability
- Audit readiness

TECHNOLOGY ALIGNMENT

Haden Grey works across leading endpoint DLP and device control platforms.

Common Endpoint DLP platforms include:

- Microsoft Purview Endpoint DLP
- Symantec (Broadcom) DLP
- Forcepoint DLP
- Digital Guardian
- Trellix DLP
- CoSoSys Endpoint Protector
- Check Point Harmony Endpoint DLP
- Sophos Device Control & DLP
- Trend Micro Integrated DLP

ENDPOINT DLP ADVISORY SERVICES

- DLP maturity assessments
- Data protection gap analysis
- Tool evaluation and rationalization
- Compliance alignment reviews
- Insider risk assessments
- M&A data protection strategy

IMPLEMENTATION SERVICES

- Endpoint DLP deployment guidance
- Device control configuration
- Policy creation and tuning
- Classification integration
- Automation enablement

ONGOING OPTIMIZATION SUPPORT

- Policy refinement
- False-positive reduction
- Incident trend analysis
- Program maturity improvement
- Roadmap updates

BUSINESS OUTCOMES

Organizations partnering with Haden Grey achieve:

- Reduced data leakage risk
- Stronger protection for sensitive data
- Improved insider risk mitigation
- Better compliance alignment
- Greater visibility into data movement
- Sustainable data protection programs
- Improved user accountability

WHY HADEN GREY

Clients choose Haden Grey for:

- Deep data security expertise
- Vendor-agnostic advisory
- Proven enterprise delivery
- Security-first, business-aligned approach
- White-glove client service
- Practical, outcome-driven solutions
